Credencys- Product Information Management Solution

Credencys – A Trusted PIM/MDM Implementation Partner
Credencys Solutions Inc., established in 2012, is a leading data management company that specializes in Product Information Management (PIM) and Master Data Management (MDM) implementation.
Credencys provides brands with a consolidated setup to manage multi-domain business data such as product data, asset data, supplier data, customer data, and location data on a single platform. By enabling organizations to access unified and trusted data, Credencys facilitates effective strategic decision-making, reduces overhead costs, simplifies business operations, and drives operational efficiency.
Being a proud partner with leading industry players such as Pimcore, Syndigo, Semarchy, and Informatica, Credencys promises to deliver cutting-edge solutions by leveraging the expertise and advanced technologies offered by its partners.
Along with PIM/MDM implementation, Credencys has a proven track record of delivering high-quality Digital Asset Management (DAM), Digital Experience Management (DXP), and Digital Commerce solutions.
Credencys builds tailored digital solutions that are aligned with the client's business objectives. Credencys serves Fortune 500 companies from a diverse range of industries, including retail, manufacturing, distribution, eCommerce, CPG, banking, finance, healthcare, and more.
Headquartered in India, Credencys has offices in the United States and Finland too. With a team of over 150 skilled technology professionals, Credencys has successfully delivered more than 500 projects to over 200 clients worldwide.
Credencys excels in delivering digital solutions that are results-driven and user-centered, ensuring that clients achieve their business objectives and provide an exceptional user experience.
