We Grow Sharp Web Apps

We build sharp web apps.
Caktus Group specializes in custom web development. With 14 years of experience, we're considered an elite firm in the open-source Python and Django community.
Our expert team, headquartered in Durham, North Carolina, provides excellent customer service and we pride ourselves on doing development the right way. We don't cut corners and we're not order-takers. We are innovative problem solvers and creative thinkers. Our experts are here to listen to your vision and needs, and then recommend solutions that will meet your goals.
In addition to custom web development, we also provide cloud services, software maintenance, and consulting services. We're a full-service firm, able to support your project from start to finish, with high-touch project management and thorough quality assurance and testing processes. However, if your vision is still taking shape, and you're not quite ready to commit, we can work with you to gain clarity through a discovery workshop that will ensure the right product is built the right way.
We have a diversity of experience with clients from the business, media, government, higher education, health care, and non-profit sectors, among others.
