*It's time to...Test*

DeviQA is a software testing company that carries out a full cycle of software testing that covers all the main stages of the project's development, starting from testing requirements at the stage of software design and finishing with final testing at the stage of product's release and implementation. With an extremely skilled team and many years of experience in such industries as Healthcare, Media and Entertainment, Business Apps, Real Estate, Education Software, FinTech & Banking, Travel Software, Cybersecurity, they make the testing process efficient and create a high-quality product. They use the best practices during the implementation of complex solutions and pay close attention to the privacy and security of customer data storage and all intellectual property.
